## WORK EXPERIENCE

### M9 LOGISTICS

09/2024 - 10/2024

#### FULLSTACK DEVELOPER

Participated in a real-world project developing a web application for managing a logistics system, using Angular for the Frontend and .NET Core for the Backend.

## PROJECTS

### CREATE TOURNAMENT

04/2024 - now

Team project

Team size: 3

#### FULLSTACK DEVELOPER

A web application for users to create and manage football tournaments with various competition formats, allowing easy management and sharing with others.

##### Responsibilities:

- Initiating the base project with Clean Architecture.
- Implementing Authentication/Authorization with JWT
- Writing endpoints to manage entities using RESTful API.
- Implementing cloud storage for images using Firebase.
- Building user interfaces for client and admin panels, and handling API integration on the frontend.
- Managing the team by assigning tasks, leading the team, and ensuring quality.
- Deploying front-end using Vercel

**Technologies:** .NET Core, Angular 16, Bootstrap, Material-UI, SQL Server, Firebase, Github

### STORE MANAGEMENT

03/2024 - 04/2024

Team project

Team size: 3

#### FULLSTACK DEVELOPER

A web application that provides users with the ability to manage their restaurants, integrating order functionality through QR codes at the tables.

##### Responsibilities:

- Initiating the base project.
- Developing functionality for customers to place orders by scanning QR codes.
- Building the user interface for customer order placement.
- Deploying applications using SmarterASP.

**Technologies:** ASP.NET MVC, Bootstrap, SQL Server, Github

## SKILLS

#### Programming languages

- C#
- Javascript/Typescript

#### Framework/Libraries

- .NET Core
- ASP.NET MVC
- Angular
- ExpressJs
- Bootstrap

#### Database

- MS SQL
- MongoDB
- MySQL

#### Version control system

- Github
- GitLab

## EDUCATION

2021 - Now

#### Information Technology / Software Engineering

#### HUTECH UNIVERSITY

Final-Year Student with GPA: 3.5/4.0
